

Trouble shooting with zoom for Mac users

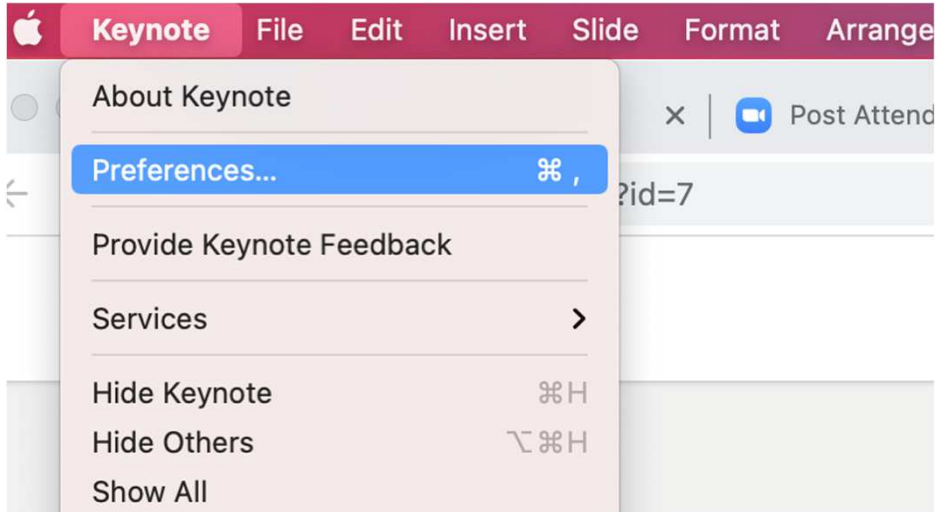

1. Open the System Preference.
2. Click the Security & Privacy.
3. Go to Screen Recording.
(You need to scroll down.)
4. If Zoom is not listed, click the lock to make changes(①) and click the '+' sign(②).

5. Add the Zoom application in Applications tab.

6. Check the allowance of microphone and camera for Zoom in the same way.

7. If you use Keynote, you can show the pointer during the keynote slide show with the setting as shown in the figure.
